Weight:	2lbs
Power:	110v USA, 220v International available
Security:	IPSec/VPN, SSL
IP:	IP Transparency, NAT-PAT, Stateful inspection firewall
Warranty:	1 year

"Great ROI - Ability to use low data plans for reduced operating costs"

Sixnet Gateway Management Utility (GMU)

Enterprise class management application provides ongoing visibility and management of a deployed network of ATM Cellular Gateways™ from a single console. Update firmware, distribute changes, and monitor critical elements (cellular signal strength, connectivity, etc.) without individual unit access.

GMU is available hosted or at your data center.

Making The Right Choice

ATM Cellular Gateways™ are available in many configurations to work with almost any ATM in use today. Choose your ATM connection type, cellular carrier, and network speed. We ship your Gateway ready and pre-configured so there is nothing to do except plug it into your ATM*.

Carrier	Ethernet/IP	Dial Port Models
2G Models	A-2200	A-2201
3G Models	A-2300	
AirCard	A-1100	A-1101

*Some processor configurations may incur a configuration charge.

For Dial ATMs, choose 2G speed for best value. Carrier provided USB AirCard is also an option.
